

MICRO-BIOLOGY

Micro Separations® GRIDDED Membrane Filter (MGCE/MGCN)

Micro Separations Sterile individually packed gridded membrane filters are widely used in the food, beverage, pharmaceutical industries for microbiology analysis of water and other liquids.

Features

- ◆ Sterile individually packed
- ◆ A range of membrane pore sizes are available to meet wide variety of applications
- ◆ Consistent performance
- ◆ Lot traceability

Specifications

Membrane material	Mixed cellulose Ester or Cellulose Nitrate
Filter Diameter	47 mm
Filter Surface	Gridded / Plain
Filter Color	White
Pore Size	0.22/0.45/0.8 µm

Ordering Information

Cat.no.	Color	Pore size	Diameter	Grid/ plain	Membrane	Packing
MGCE-02-47	WHITE	0.22µm	47	Gridded	Cellulose Esters	100
MGCE-04-47		0.45µm	47		Cellulose Esters	
MGCE-08-47		0.8µm	47		Cellulose Esters	
MGCN-02-47	WHITE	0.22µm	47	Gridded	Cellulose Nitrate	100
MGCN-04-47		0.45µm	47		Cellulose Nitrate	
MGCN-08-47		0.8µm	47		Cellulose Nitrate
