

Micro Separations Micro Cellulose Thimbles Type-MCT

Micro Separations Cellulose Extraction Thimbles have a reputation for purity and consistence high quality. Cellulose extraction thimbles are produced high quality cellulose cotton linter which has excellent mechanical strength and retentive.

Features and benefits

- ◆ Designs to fit most commercial availability Soxhelet extractors
- ◆ Temperature resistant (500oC)
- ◆ Available in arrange of size and wall thickness to suit your application

Specifications

Property	Unit of Measure	Value	Variations
Filter Media	n/a	Cellulose	n/a
Thickness	mm	Single or double	-
Particle retention for single Thickness	µm	10µm	-
Particle retention for double thicknesss	µm	6µm	Min.
Maximum operating Temperature	Centigrade (oC)	105°C	Max
Binder	-	No Binding	-

Thickness of Thimbles used as per Application Smoke Stack gas monitoring
